

The scatter plot displays the sepal length (cm) for three species of Iris. The x-axis is labeled 'species' and the y-axis is labeled 'sepal length (cm)'. The data points are categorized by species: setosa, versicolor, and virginica. The setosa species shows a distinct cluster at the bottom (lower sepal length). The versicolor species shows a cluster in the middle. The virginica species shows a cluster at the top (higher sepal length).
